

# NATURAL EROSION CONTROL FOR SLOPES AND REVEGETATION

## JUTE BIODEGRADABLE EROSION CONTROL MAT (MEDIUM)

**100%**

**organic and  
biodegradable  
fibres**

**Promotes  
plant  
growth**

**Can withstand  
water flow  
up to**

**1.8  
seconds**

Jute Mat Medium is a medium-grade biodegradable erosion control mat made from 100% natural jute fibres. It effectively acts as a blanket, protecting topsoil from water and wind erosion while supporting a moist micro-climate for plant growth.

### **BENEFITS OF JUTE MAT MEDIUM**

- Prevents soil erosion on vegetated slopes, helping maintain slope stability and support healthy plant establishment
- Suitable for use in conditions with water velocities reaching up to 1.8 metres per second
- Acts as a roll-on mulch, adding organic matter to the soil as it breaks down
- Ideal for revegetation and can be used to suppress weeds
- Made from 100% natural, organic fibres that biodegrade within approximately 18 months, without posing an entanglement risk to wildlife
- Strong yet flexible during installation, allowing it to conform easily to ground contours
- Ideal for slopes up to 1:1 grades, roadsides and landscaping, garden and revegetating beds, wetlands and riparian batters
- Enables easy handling and installation by one or two people

## APPLICATIONS

Jute Mat Medium is designed for effective soil stabilisation across a range of applications including:

- Steep slopes and batters of up to 1:1 or 45 degrees
- Roadside landscaping and embankments
- Golf courses and landscaped areas
- Wetlands and riverbanks
- Coastal and environmentally sensitive sites

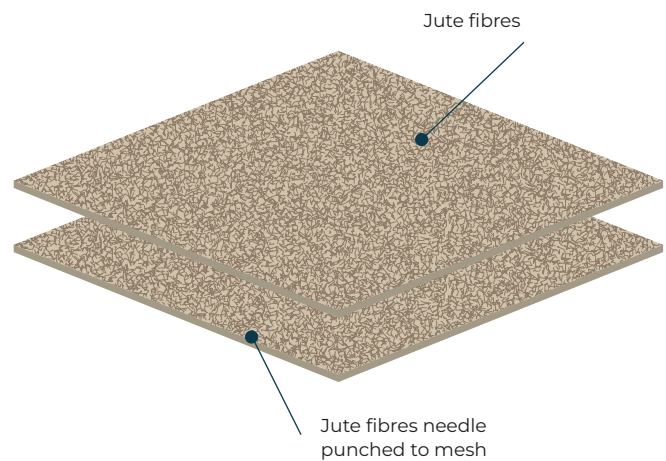

Ideal for the stabilisation of low-flow drainage lines, Jute Mat Medium helps protect topsoil and maintain surface integrity in erosion-prone areas.

## JUTE MAT MEDIUM RANGE

Code	Roll Size	m <sup>2</sup>
<b>JUTE450200025</b>	2m x 25m	50

A range of jute pins are also available from Geofabrics
